

Product Specification

Ercarbon SH

Ercarbon SH is selectively acting activated carbon powder for beverage treatment.

Analysis:

Appearance	black powder
Smell	neutral
Bulk density	300 - 400 g/dm ³
Moisture	< 15 %
pH-value (5 %):	9 – 10.5

Parameters for information:

Raw material	coconut shells
Surface BET	approx. 1000 m ² /g
Ash:	< 10 %
Heavy Metals (as Pb):	≤ 40 mg/kg
Lead:	≤ 10 mg/kg
Water Extractables:	≤ 4.0%

The purity of this carbon complies with the statutory requirements for foodstuffs.
